Accuracy: **63.4%**

At Light and Motion we know what our light output should be on paper but we also know what it is in the real world, so when we quote our output you can trust it is accurate and we're not leaving you in the dark. With massive power comes control, and with some of the best lenses and reflector technologies in the industry, it's not just more light, it's useable light. For information on our lights visit our website.
